## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-42 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McCutcheon et al., US No. 5,560,587 ("McCutcheon").

In short, McCutcheon discloses a seal comprising a flexible resilient loop (FIG. 6). There is a flexible resilient sealing lobe (144a) extending around the loop. There is a first channel (defined by protrusions 146a and 148a) extending around the loop and facing axially away from the sealing lobe (144a). There is a second channel (122a) facing inwardly of the loop.

The loop is substantially circular (Fig. 5). There is a reinforcing band (126a) positioned substantially within the first channel.

The reinforcing band may be substantially encapsulated within the loop (as shown in FIG. 7A).

The material of the reinforcing band (126a) is a stainless steel and the loop is an elastomer.
